

Patient Authentication

How to allow a third-party app to access your health record

Patients of providers that use Epic software are able to connect third-party applications (apps) to retrieve parts of their health record for their personal use. Examples of data that can be pulled into an app include lab results, allergies, medications and immunization history.

In order to authenticate an app to retrieve your health data, follow these steps:

1

Make sure you have a My CS-Link™ account created for your healthcare provider organization. You will need your login credentials for the authentication process.

2

Access the application on your personal device. Carefully review the app's terms and conditions.

3

The app may ask you to select your healthcare provider from a list. Select your healthcare provider.

4

You will now be redirected to your provider's My CS-Link login screen. Enter your credentials to continue.

5

Allow Access to Your Account

[Redacted] wants you to share your health data with them by linking your My CS-Link account. Note that this app might have been created by a developer who is not affiliated with your healthcare organization.

Which patient do you want [Redacted] to be able to link to?

CONTINUE

If you have access to another person's account, you will need to select to which account you are linking the app.

Example of an app that has filled out the questionnaire with useful information:

Allow Access to Your Account

MU3 API Configuration Checker v2 wants you to share your health data with them.

What you need to know about MU3 API Configuration Checker v2

Before allowing MU3 API Configuration Checker v2 to access your account, please be aware of the following important details. This information is provided by the creators of MU3 API Configuration Checker v2.

All mentions of the term "data" refers to the data from your electronic health record.

Who is offering the app?

This app is not provided by your healthcare provider. This app is provided by Epic, a for-profit organization that is not a HIPAA-covered entity or business associate of your healthcare provider, for purposes of this feature.

Moving your data from your electronic health record to this app may move it out of a space protected by federal health privacy laws. The app will be able to use this data for any purposes permitted by your agreement with them. You should carefully review the app's privacy policy and statements for any privacy protections provided.

Does the app developer allow you to obtain a record of the data that have been collected about you?

The app developer does not allow you to obtain a record of the data that have been collected about you.

Does this app allow you to delete the data that have been stored about you?

This app does not allow you to delete the data that have been stored about you. The app does not keep your data if you remove the app from your device and close your account. The privacy policy and statements of Epic may contain more details.

How is this app funded?

This app is funded by the business ventures of Epic.

Where does this app save your data?

This app does not save your data.

How does the app developer use your data?

The app developer may use data about you to improve its services in the future. Epic's privacy policy and statements may have more details on how and when the app uses your data.

Who has access to your data when you provide it to this app?

Only people who have access to this device could access the data.

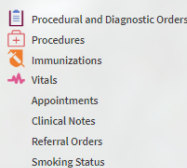

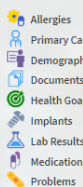

How long will the app have access to my information?

This app will have access to your information for 1 hour(s) and 0 minute(s), until Thursday June 11, 2020, 11:52 AM

Allow or Deny Access

MU3 API Configuration Checker v2 wants your permission to access the following information:

BACK

DENY ACCESS

ALLOW ACCESS

6

You may see a with details about the app. These details come from a questionnaire that the app developer fills out and attests to, such as how the app is funded, whether it distributes your data to other parties and whether you're able to delete or see records of the data the app collects. Review this information carefully and determine whether you would like the app to have access to your health information. If you would like to allow the app to access your data, check the "I have read the statements above" box, and then click "Allow Access."

Example of an app that has neglected to fill out the questionnaire:

Allow Access to Your Account

<application name> wants you to share your health data with them.

This app's developer has NOT yet submitted to us how they plan to use your data. Once your data has been shared with <application name>, it could be made public and you may not be able to revoke access to it.

This app's developer has not shared any of the following Terms of Use:

- What type of organization is offering this app
- How the app is funded
- How your data will be stored
- Who will have access to your data when it is provided to the app
- If this app tells you about the data it has collected about you
- How your data will be retained
- How your data will be used

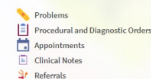

How long will the app have access to my information?

This app will have access to your information for 1 hour(s) and 0 minute(s), until Wednesday April 15, 2020, 1:26 PM

Allow or Deny Access

<application name> wants your permission to access the following information:

7

You can review and remove app access to your health data at any time by navigating to the “Manage My Linked Apps and Devices” in My CS-Link.
